

## Rules to override method

- ① We cannot Reduce visibility of overridden method  
But we can increase

P → public void disp1()

↓  
y

C → void disp1()

↓

y

≡ ✗

- ② Return type of overridden method must be same as that of overriding method in parent. (✓)

- ③ Return type of overridden method in child class can be different as that of parent if it is co-variant return type (return type is - A relationship).
