

=> After these classes is array concept gone? outdate?

Ans - NO

when we have storing large data

=>

Array

}

collection

(ArrayList, LinkedList) - - - -

=> when to use array over ArrayList?

=> whenever ~~=>~~ size of the data is known

²
if you're sure that data is homogenous/similar
then you must go with array.

=> array is faster than ArrayList

ArrayList -> collection
↳ object

↳ object -> new instance is created
